

Superior Solutions

Specialised cleaner for steel and alloy wheels

- A powerful blend of chemicals specifically formulated to rapidly penetrate and remove brake dust, metal oxides, traffic film, dirt and corrosion.
- Cleans and brightens wheels quickly and easily.
- Saves energy, time and labour. Further improves image.
- High performance: a blend of acids, inhibitors and wetting agents designed for use on steel and alloy wheels.
- Removes fats, oils, brake dust, mud, axle grease, etc.
- Easy application: ready-to-use product.
- Acidic cleaner: cleans and deoxidises at the same time.
- Removes surface rust stains.
- Leaves a trace-free, shiny appearance.
- Does not contain dyestuffs.
- Multi-purpose: can be used on all types of discs and wheel covers (metallic and plastic).

USAGE

Used in a concentrated form. Spray directly onto the discs and leave to act for 1 to 2 minutes. Scrub, if heavily soiled. Rinse with pressured water. For better wash down, use a pressure spray gun.

USAGE CONDITIONS

Do not apply to glass. Never leave the product to dry on the cleaned surface before wash-off. See the user instructions on the pack.

SPECIFICATIONS

Appearance: colourless clear liquid.

Density at 20°C: approximately 1.

pH: approximately 1.

All the information in this document is based on our practical experience and/or laboratory tests. Due to large differences in the conditions of use and unpredictability of the human factor, we recommend that you always test our products prior to their actual use. At present, this technical data sheet may have been already reviewed according to modified regulations, availability of components or newly acquired information. We will send you the latest and the only valid version upon request.
